

# TANA

## RENTAL

### Rental machines for solid waste management

# Tana Rental machines

Tana Rental offers reliable TANA machinery for various solid waste management needs; we offer solutions for shredding, screening and separation of waste.

The Tana service network ensures maximum uptime for each of the machines and with TANA ProTrack® information management system remote monitoring and optimization of the machines is effortless. Screens and screening drums in different mesh sizes make TANA machines versatile, helping you get the particle size you want easily.

## Request a demo to find the best fit.

All of the machines in the Tana Rental fleet are serviced and ready to work before being rented. Ask for a demo for the machine you are interested in to ensure it is the right fit for your needs. Tana Rental staff and the service network are always available for questions and enquiries.

## Shredding

### TANA Shark 440

Slow-speed mobile shredder

The slow-speed, single rotor TANA Shark shredder offers unique versatility. The robust TANA Shark is a great fit for difficult materials like tires and mattresses but also for various waste types like mixed, wood and construction waste.

With the help of detachable screens you can adjust the end particle size from 50 to 500 mm (2" to 20"). TANA Shark comes equipped with an overband magnet that separates ferrous metals for additional profit and a clean end product.

# Screening

## TANA 6D

Smart drumscreen

The TANA 6D smart drum screen offers high capacity and features that help you optimize your screening process. The 5,5 m (18') long, 2,2 m wide (7') screening drum gives high capacity and the conveyor scales allow for monitoring performance in real time.

The drum of the TANA 6D is easy to change within minutes and the free-rolling cleaning brush makes screening wet material possible without clogging.

# Separation

## TANA VS1220

Wind sifter

TANA VS1220 wind sifter separates light from heavy materials with a high grade of accuracy. It gives you more value by cleaning waste streams for further reuse or recycling.

Its simple, robust and adjustable design enables high quality separation with low operating costs. Can be used with a variety of waste streams, such as C&I waste, wood, compost and slag.

# Tana Rental

## Tana solid waste management solutions – Remove risk by renting

Tana is a privately-owned company that offers innovative solutions in solid waste management. With almost 50 years of experience in the field TANA machines are designed in Finland to this day. Our solutions are used across the globe, with machines operating in over 50 countries.

Tana Rental makes the flexible use of TANA machinery possible without large investments. Contact us for a demo, find the best fit and we deliver a serviced Tana solution for your needs.

## This is how Tana Rental works

Tana Rental staff helps you determine the best solution for your needs. We service, wash and deliver the machine to the location of your choosing and train your staff on-site so you can get to work as fast as possible.

Tana Rental charges only for operating hours that begin after your staff has been trained and the machine is operational. You only pay for time the machine is in operation, making cost-calculations simple.

### Tana Rental responsibilities:

- Machine service & maintenance
- Freight organising (delivery & return)
- Washing of the machine
- User training
- Insurance
- Wear parts (knives, screens, etc.)

### Customer responsibilities:

- Freight fees (delivery & return)
- Fuel
- Rent (based on operating hours)

Please ensure you make your reservation well in advance. This way Tana Rental can ensure you get the machine you want when you need it. **Call us now!**
