TANA SHARK 220/440 SHREDDERS

All the parts you need in one set.

Each Original TANA Part Set includes all the necessary parts to keep your TANA machine going.

Counter tool set, for TANA C Series 220/440

Order number

921518

- Locking component **23 pcs**
- Counter tool, curve **21 pcs**
- Half tool **2 pcs**

Coated counter tool set, for TANA C Series 220/440

Coated tools are suitable especially for shredding high wear materials.

Order number

936092

- Locking component **23 pcs**
- Counter tool, curve **21 pcs**
- Half tool **2 pcs**

For prices and availability, please contact your nearest [authorized Tana distributor](#).

ORIGINAL TANA PART SETS

Did you know that neglecting wear part care actually increases operational costs of the process?

Tools that are too worn result in the rotor chewing the material and letting it go through. This can cause the cleaning combs being damaged at the back of the rotor, saddles and the side door wearing and its bearings and hinges breaking just to mention a few.

It also means increased fuel consumption and lower output capacity. This is far more money lost and spent compared to the cost of new TANA part sets.

Counter tool set, for TANA D Series 440

Order number

936098

- Locking component **23 pcs**
- Counter tool, curve **21 pcs**
- Half tool, chamfered **2 pcs**

Coated counter tool set, for TANA D Series 440

Coated tools are suitable especially for shredding high wear materials.

Order number

936096

- Locking component **23 pcs**
- Counter tool, curve **21 pcs**
- Half tool, chamfered **2 pcs**

TANA SHARK 220/440 SHREDDER

Half tool set, for TANA C & D Series

Required in coarse pre-shredding. Half tools replace every second counter knife.

Order number

921519

- Locking component **11 pcs**
- Half tool **11 pcs**

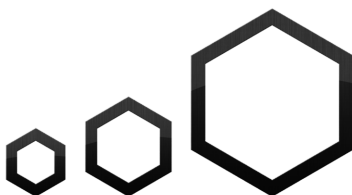

Screens

In order to ensure and adjust the end product particle size of the shredded material a suitable screen is needed. Tana offers screens for Shark 440 and 220 models respectively in the following mesh sizes:

Shark 440 C Series & 220/440 D Series

Mesh size determines end-product particle size.

ORIGINAL TANA PART SETS

When to use what kind of rotor

In principle you can use both rotors for all applications but it will become more difficult to work with the 44 when doing applications that are already on the max of the 33 rotor. More tools mean more power needed to turn the rotor. When doing applications in the red zone with a 44 rotor, you will need to load even more carefully and in a smarter way to reach the same capacity as with the 33 and to prevent too much reversing.

Standard rotors with 33 tools for Shark 440 models

Rotors are delivered with standard rotor tools.

TANA

Original TANA wear parts

Optimal performance and maximum uptime with original TANA wear parts.

The TANA logo is positioned at the top left of the page. It consists of the word "TANA" in a bold, white, sans-serif font. The letter "A" is stylized with a small orange triangle pointing upwards from its base. The entire logo is set against a dark background that features a blurred image of industrial machinery and a pile of scrap metal.
